## **IT Engineer (Network)**

### **Job Description**

- Design, implement, and manage network infrastructure and services, including servers, routers, switches, firewalls, and other network devices.
- Configure and maintain network devices, ensuring that they operate efficiently.
- Proactively monitor, troubleshoot, and resolve network issue, outages, and cloud infrastructure/ services implementing corrective measures in a timely and effective manner.
- Ensure high availability, scalability, and security of server infrastructure, cloud-based applications, systems, and data.
- Implement and maintain backup solutions for network, server, and cloud infrastructures.
- Collaborate with cross-functional teams to design and implement network infrastructure solutions that meet business requirements.
- Ensure that network and cloud infrastructure services meet security and compliance requirements.
- Stay up to date with the latest networking and cloud technologies and best practices and make recommendations for improvement.
- Create and maintain documentation of network infrastructure, cloud infrastructure, configurations, and procedures.

### **Requirements**

- Bachelor's degree in networking, computer science, information technology, or a related field
- With 1 - 3 years of experience in network engineering or a related field
- Knowledge in LAN/WAN/Wireless environments, IT Security, or Internet technology
- Experience in Windows OS, Cloud Infrastructures (Azure & AWS), Active Directory, Information Security, backup & recovery or network equipment such as routers, firewall, switches, M365 etc
- Experience in managing and maintaining a complex network infrastructure in a large enterprise environment.
- Excellent communication and collaboration skills to work effectively with cross-functional teams.
- Ability to work independently and as part of a team.
- Relevant industry certifications, such as CCNA, CCNP, AWS Certified Solutions Architect, or Microsoft Certified Azure Solutions Architect, are a plus.
